

GlassTF

Efficiency and quality
in **flexible packaging.**

Parnaplast
Packaging

Over half a century **developing** **ways to protect.**

This is how we became a benchmark in flexible packaging in Brazil and abroad.

Every package produced reflects the attention and care of all our professionals, who work to deliver the best solutions in barrier protection with the precision and excellence your business requires

An **Innovative** Parnaplast Process

The Glass process recreates an extremely accelerated cooling, following the same logic as glass manufacturing.

The faster the cooling, the more amorphous the plastic structure becomes, providing differentiated properties such as high transparency, gloss, flexibility and mechanical resistance.

Parna GlassTF

Thermoforming

Parna GlassTF is a medium or high barrier flexible film for thermoforming food packaging, produced with the best raw materials available in the market and strictly following each customer's specifications.

The TF line is complemented by semi-rigid films and printed lidding films. Both solutions can be produced with Easy-peel system and the newest resealable technology (open & close system).

Applications

Products packaged under vacuum and modified atmosphere (MAP), such as:

- Sausages
- Fresh sausages
- Smoked products
- Fresh meat
- Sliced products
- Bread
- Others
